

UTIL-12:Doc publication script definition

Artic42

June 30, 2022

Abstract

The objective of this script is to automatically upload a file to OneDrive. This will allow to check the documents from any device. And will allow to easily link the docs to JIRA tasks without take space in the server.

1 Folder structure

The documents will automatically be added to a folder structure to make things easier to find.

```
OneDrivePath
├── ProjectName
│   ├── EpicName1
│   │   └── TaskNumber:DocTitle
│   └── EpicName2
└── ProjectName2
```
